Stuttgart

## BLECHEXPO STEEL CONVENT 2023

On 07 November 2023, the 1st day of Blechexpo 2023, there will be an additional highlight at the trade fair in Stuttgart: After the successful start in 2021, the trade fair organizers, P.E. Schall GmbH & Co. KG, have decided to organize the Blechexpo Stahl Convent 2023. **Its motto is "Challenges on the steel markets in 2023"**. The Convent is organized by the **Stahl-Kommunikation** agency. The venue will be the forum area in exhibition hall 10 and the event is scheduled to start at 1:00 pm. We cordially invite you to this event already today. **Participation is free of charge.**

In times of climate protection, new, energy- and climate-friendly paths for steel production are being researched worldwide or have already been successfully taken. The "green transformation" of industry has been pursued with great vigour for some time. Decarbonization is on everyone's lips, and green hydrogen is supposed to help make steel production lower in emissions. It is only logical that this not only protects the climate and the environment, but also enormously increases costs along the steel process chain.

The situation is further aggravated by the ongoing conflict in Ukraine, which is further exacerbating the situation on the steel markets.

Renowned speakers from leading international companies will speak about this complex of topics and discuss them with visitors to the Convention.
